SUMMARY OF SAFETY AND EFFECTIVENESS

1. Device Name : Magnetic Resonance Imaging Accessory
2. Proprietary Name : Magna 5000 Phased Array CTL Spine Coil
3. Classification : Class II
4. Establishment Registration #: 1529041
5. Manufacture Facility Location: USA Instruments, Inc
1515 Danner Drive
Aurora, Ohio 44202, USA
Telephone: 330-562-1000; Fax: 330-562-1422.
6. Performance Standard: No applicable performance standards have been issued under Section 514 of the Food, Drug and Cosmetic Act.
7. Intended Use: The Magna 5000 Phased Array CTL Spine Coil is a receive-only phased array RF coil, used for obtaining diagnostic images of the spine region (cervical, thoracic and lumbar anatomy) in Magnetic Resonance Imaging Systems. The indications for use are the same as for standard MR Imaging. The Magna 5000 Phased Array CTL Spine Coil is designed for use with the Signa HFO/i 0.7T MRI scanner manufactured by GE Medical Systems.
8. Device Description: The Magna 5000 Phased Array CTL Spine Coil is a multi-element phased array receive-only coil. The coil is shaped to conform to the contours of the spine and has a removable anterior section for imaging the anterior cervical region. The coil also has three bridges consisting of coil elements for enhanced imaging of the thoracic and lumbar spine. The elements and associated circuitry are enclosed in a housing made of plastic materials, which are fire rated and have high impact and tensile strength.

9. Safety and Effectiveness

Magna 5000 Phased Array CTL Spine Coil Product Features	Comparison to predicate device or other 510(k) cleared product
Intended Use: Imaging of the spine.	-Similar to the Premier 7000 Phased Array C/T/L Spine Coil manufacture by USA Instruments, Inc. (K980157)
Indications for Use: Identical to routine MRI imaging	-Similar to the Premier 7000 Phased Array C/T/L Spine Coil manufacture by USA Instruments, Inc. (K980157)
Coil Material: ABS/PVC Plastic alloy, Polyurethane Plastic, Glass fiber reinforced polyester (Flame retardant Fiberglass), Naughahyde (fabric material)	-Similar to the Premier 7000 Phased Array C/T/L Spine Coil manufacture by USA Instruments, Inc. (K980157)
Coil Design: Receive-only phased array design	-Similar to the Premier 7000 Phased Array C/T/L Spine Coil manufacture by USA Instruments, Inc. (K980157)
Decoupling: RF Chokes with Switching Diodes	-Similar to the Premier 7000 Phased Array C/T/L Spine Coil manufacture by USA Instruments, Inc. (K980157)
Prevention of RF Burns: Does not transmit RF Power, Decoupling isolates the coil elements from RF fields during RF transmission, Coil elements and circuitry are enclosed in a non-conductive housing.	-Similar to the Premier 7000 Phased Array C/T/L Spine Coil manufacture by USA Instruments, Inc. (K980157)
Radio Frequency Absorption: Coil is a receive only coil and does not transmit RF power	-Similar to the Premier 7000 Phased Array C/T/L Spine Coil manufacture by USA Instruments, Inc. (K980157)
Formation of Resonant Loops: Decoupling isolates coil elements from RF fields during RF transmission. Length of cable and stiffness does not permit looping	-Similar to the Premier 7000 Phased Array C/T/L Spine Coil manufacture by USA Instruments, Inc. (K980157)

Re: K994345
Magna 5000 Phased Array CTL Spine Coil
Dated: December 22, 1999
Received: December 23, 1999
Regulatory class: II
21 CFR 892.1000/Procode: 90 MOS

Dear Mr. Thomas:

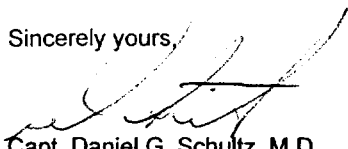

We have reviewed your Section 510(k) notification of intent to market the device referenced above and we have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration.

If your device is classified (see above) into either class II (Special Controls) or class III (Premarket Approval), it may be subject to such additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 895. A substantially equivalent determination assumes compliance with the Current Good Manufacturing Practice requirements, as set forth in the Quality System Regulation (QS) for Medical Devices: General regulation (21 CFR Part 820) and that, through periodic QS inspections, the Food and Drug Administration (FDA) will verify such assumptions. Failure to comply with the GMP regulation may result in regulatory action. In addition, FDA may publish further announcements concerning your device in the Federal Register. Please note: this response to your premarket notification submission does not affect any obligation you might have under sections 531 through 542 of the Act for devices under the Electronic Product Radiation Control provisions, or other Federal laws or regulations.

This letter will allow you to begin marketing your device as described in your 510(k) premarket notification. The FDA finding of substantial equivalence of your device to a legally marketed predicate device results in a classification for your device and thus, permits your device to proceed to the market.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801 and additionally 809.10 for in vitro diagnostic devices), please contact the Office of Compliance at (301) 594-4613. Additionally, for questions on the promotion and advertising of your device, please contact the Office of Compliance at (301) 594-4639. Also, please note the regulation entitled, "Misbranding by reference to premarket notification" (21 CFR 807.97). Other general information on your responsibilities under the Act may be obtained from the Division of Small Manufacturers Assistance at its toll-free number (800) 638-2041 or (301) 443-6597, or at its internet address "<http://www.fda.gov/cdrh/dsma/dsmamain.html>".

Sincerely yours,

Capt. Daniel G. Schultz, M.D.

Radiological Health

Enclosure

510(k) Number (if known): K994345

Device Name: Magna 5000 Phased Array CTL Spine Coil

Indications for Use: The Magna 5000 Phased Array CTL Spine Coil is designed to provide Magnetic Resonance Images of the spine anatomy. The Magna 5000 Phased Array CTL Spine Coil is designed for use with the GE Signa HFO/i 0.7T scanner.

Anatomic Regions: Spine
Nuclei Excited: Hydrogen

The indications for use are the same as for standard imaging:

The GE Signa HFO/i 0.7T system is indicated for use as an NMR device that produces images that: (1) correspond to the distribution of protons exhibiting NMR signal, (2) depend upon NMR parameters (proton density, spin lattice relaxation time T1, spin-spin relaxation time T2) and (3) display the soft tissue structure of the head and whole body. When interpreted by a trained physician, these images yield information that can be useful in the determination of a diagnosis.
